FOR IMMEDIATE RELEASE

Kelowna's *Efficient Spaces* Becomes BC's First Green Certified Moving Company

Woman-owned business earns province's first green certification in the moving industry, setting a new standard for sustainable moves.

KELOWNA, BC — September 9, 2026 — Efficient Spaces: Organization & Design is proud to announce that it has become **British Columbia's first Green Certified moving company** through the **BC Green Business program**, delivered by the Synergy Foundation.

For founder and owner **Becky Lapierre**, the designation represents more than environmental responsibility. It reflects her vision for a different kind of moving company — one that puts people first while making thoughtful choices for the environment and the community.

“What if moving didn't have to suck?”

That question is at the heart of Efficient Spaces.

The company provides a complete approach to moving and life transitions, including **downsizing, packing, moving coordination, cleaning, unpacking, organizing, estate transitions and responsible disposal**. Rather than simply moving belongings from one place to another, Efficient Spaces helps clients decide what should move, what can be donated or sold, and what can be reused or recycled.

This approach is especially meaningful when helping seniors downsize, families navigate an estate, or clients facing an overwhelming transition.

Green Business in Action

Efficient Spaces has built sustainability into its day-to-day operations through practices such as reusing moving boxes and materials, sourcing and using reusable packing supplies, operating an electric vehicle, choosing recyclable and eco-friendly products, and finding new homes for usable belongings through donation and resale.

The result is a moving experience designed to reduce both **stress and unnecessary waste**.

“Being BC’s first Green Certified moving company is important to me because I want to show that you can build a successful business around your values,” says Lapierre. “We can take care of our clients, support our community and make better choices for the environment. We don’t have to choose one over the other.”

A Woman-Owned Business With a Bigger Purpose

Lapierre is also passionate about what it means to build a business as a woman entrepreneur.

“I want women to know that they can create something successful without having to fit into someone else’s idea of what business should look like,” she says. “You can build something from your own experience, your values and your vision — and make a difference while doing it.”

For Lapierre, that means creating a company that contributes to the community she calls home while encouraging others to think differently about the moving industry.

“I don’t want us to be the only green moving company,” she says. “I want us to be the first. If we can inspire other companies to do better, then we’ve accomplished something bigger than ourselves.”

More Than Moving

Efficient Spaces helps individuals, families, seniors and businesses throughout the Central Okanagan, BC and beyond navigate major transitions with professional moving, organization and downsizing services.

The goal is simple: **less waste, less stress and more care.**

“That’s what Efficient Spaces means to me,” says Lapierre. “Helping people move forward while leaving things a little better than we found them.”
